

ABSTRACT

An exchangeable security, tradable on a securities exchange is issued at a share price that is a discount from the share price of an underlying security or basket of
5 underlying securities. At or prior to maturity of the exchangeable security, a holder of the exchangeable security may exchange a share of the exchangeable security for a share of the underlying security or basket of underlying securities. The exchangeable security may also include a linked payment that is redeemable for the full amount of the payment on maturity of the exchangeable security. Alternatively, the exchangeable security may
10 be issued at the share price of the underlying security with the linked payment. The invention provides methods for issue, trade and redemption as well as systems for issue, trade and redemption of the security.
